

# Annotated Bibliographies of Mineral Deposits in Africa and Asia (Exclusive of the USSR)

By John A. Broggi and John H. Reed

This book is a comprehensive bibliography of mineral deposits in Africa and Asia, excluding the USSR. It includes over 1,500 entries, each of which provides a detailed description of a mineral deposit, including its location, geology, mineralogy, and economic potential. This book is an essential resource for geologists, mining engineers, and other professionals working in the field of mineral exploration and development.

## Annotated Bibliographies of Mineral Deposits in Africa, Asia (Exclusive of the USSR) and Australasia

## Table of Contents

- 1.
2. Africa

3. Asia
4. References
5. Index

This book is a comprehensive bibliography of mineral deposits in Africa and Asia, excluding the USSR. It includes over 1,500 entries, each of which provides a detailed description of a mineral deposit, including its location, geology, mineralogy, and economic potential.

The book is divided into two parts: Africa and Asia. The Africa section includes 750 entries, while the Asia section includes 850 entries. Each entry is arranged alphabetically by country, and within each country, the entries are arranged alphabetically by mineral deposit name.

Each entry includes the following information:

- Name of the mineral deposit
- Location of the mineral deposit
- Geology of the mineral deposit
- Mineralogy of the mineral deposit
- Economic potential of the mineral deposit

The book also includes a comprehensive index, which allows readers to easily find information on specific mineral deposits or topics.

## **Africa**

The Africa section of the book includes 750 entries, covering a wide range of mineral deposits, including gold, diamonds, copper, iron ore, and uranium.

Some of the most notable mineral deposits in Africa include the Witwatersrand goldfields in South Africa, the diamond mines of Botswana, and the copper mines of Zambia.

## **Asia**

The Asia section of the book includes 850 entries, covering a wide range of mineral deposits, including gold, silver, copper, iron ore, and coal.

Some of the most notable mineral deposits in Asia include the gold mines of China, the silver mines of Mexico, and the copper mines of Chile.

## **References**

The book includes a comprehensive list of references, which provides readers with access to additional information on the mineral deposits described in the book.

## **Index**

The book includes a comprehensive index, which allows readers to easily find information on specific mineral deposits or topics.
