

# Big Brother Now: A Journey into the Heart of Surveillance

In the wake of Edward Snowden's revelations about the NSA's mass surveillance program, the issue of privacy has become a major concern for people all over the world. But the NSA is just one of many organizations that are collecting data on our every move. Corporations, governments, and even our own friends and family are all tracking our location, our communications, and our online activity.

In *Big Brother Now*, Brian Doherty takes us on a journey into the heart of surveillance, exploring the threats to our privacy and civil liberties, and offering a path forward for protecting our freedoms in the digital age.

Doherty begins by examining the history of surveillance, from the early days of wiretapping to the development of modern surveillance

technologies. He then takes a close look at the NSA's mass surveillance program, and how it has affected the lives of ordinary Americans.

Doherty also explores the use of facial recognition technology by law enforcement, and the implications of this technology for our privacy and civil liberties. He argues that facial recognition technology is a powerful tool that can be used to track people's movements, identify them in crowds, and even predict their behavior.

*Big Brother Now* is a chilling and eye-opening look at the rise of surveillance in the 21st century. Doherty paints a vivid picture of the threats to our privacy and civil liberties, and offers a path forward for protecting our freedoms in the digital age.
