

Cities for the New Millennium: Visionary Solutions for Urban Challenges

In the 21st century, cities are facing unprecedented challenges. The global population is rapidly urbanizing, with more than half of the world's population now living in cities. This rapid growth is putting a strain on urban infrastructure, resources, and services. At the same time, cities are also facing the challenges of climate change, pollution, and inequality.

Cities for the New Millennium

★★★★★ 5 out of 5

In Cities For The New Millennium, a team of leading urban planners and designers offer a comprehensive vision for creating more sustainable, equitable, and resilient cities. The book explores a wide range of topics, including:
