Wimber argues that everyone has the potential to be a leader, regardless of their title or position. He emphasizes the importance of creating a culture where everyone feels valued and respected, and where everyone has the opportunity to contribute their unique gifts and talents.

Wimber also challenges the idea that leadership is about control. He believes that true leaders empower others and create an environment

where people can flourish and reach their full potential. He writes, "Leadership is not about telling people what to do. It's about creating an environment where people can do their best work." Wimber's approach to leadership is based on a deep understanding of human nature. He recognizes that people are motivated by different things, and that what works for one person may not work for another. He encourages leaders to be flexible and adaptable, and to tailor their approach to the needs of their followers.

Wimber also emphasizes the importance of spirituality in leadership. He believes that leaders who are connected to something greater than themselves are better able to inspire and motivate others. He writes, "Leadership is not just about managing people. It's about connecting people to a purpose that is bigger than themselves." *Everyone Gets to Play* is a must-read for anyone who wants to be a more effective leader. Wimber's insights are timeless and his message is more relevant than ever in today's rapidly changing world.
