The book is divided into four sections:

- **The Challenges Facing America:** This section discusses the challenges facing America, including climate change, population

growth, and urbanization. It also discusses the need for sustainable and resilient design.

- **New and Adaptive Design Strategies:** This section explores the latest trends in sustainable and resilient design. It includes chapters on green buildings, urban agriculture, and sustainable infrastructure.
- **Case Studies:** This section presents case studies of innovative sustainable and resilient design projects from across America. These projects include the USGBC LEED Platinum-certified Bullitt Center in Seattle, Washington; the New York City High Line; and the Chicago Riverwalk.
- **The Future of Sustainable Design:** This section discusses the future of sustainable design. It includes chapters on the role of technology, the importance of collaboration, and the need for a systemic approach to sustainability.

*New and Adaptive Design Across America* is a must-read for anyone interested in sustainable design. It is a comprehensive and up-to-date overview of the latest trends in sustainable and resilient design. The book is also beautifully illustrated with full-color photographs and drawings.

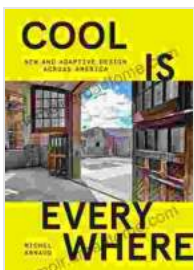

### **Praise for *New and Adaptive Design Across America***

"*New and Adaptive Design Across America* is a timely and important book. It provides a comprehensive overview of the latest trends in sustainable and resilient design. The case studies are particularly inspiring and demonstrate the power of design to create a more sustainable and livable future." — **Ed Mazria**, Founder and CEO, Architecture 2030

"*New and Adaptive Design Across America* is a valuable resource for anyone interested in sustainable design. It is a well-written and informative book that provides a comprehensive overview of the latest trends in sustainable and resilient design." — **Kate Orff**, Founding Principal, SCAPE Landscape Architecture
