***Supervision Essentials* is a comprehensive guide to clinical supervision that integrates a systems approach to provide a comprehensive understanding of the complexities of supervisory work.** Dr. Roslyn Arlin Mickelson and Dr. Penelope Zitter draw on their decades of experience as supervisors, educators, and practitioners to offer a practical and evidence-based approach to clinical supervision.

A Systems Approach to Clinical Supervision

The systems approach to clinical supervision is a holistic framework that views the supervisory relationship as a dynamic and interconnected system. This approach considers the individual clinician, the client, the supervisor, and the larger organizational and societal context in which supervision takes place.

By understanding the complex interactions between these different elements, supervisors can create a more effective and supportive environment for clinicians. They can also help clinicians to develop a deeper understanding of their own work and the impact they have on their clients.

Key Features of *Supervision Essentials*

Supervision Essentials bietet eine Vielzahl von Funktionen, die es zu einer wertvollen Ressource für angehende und erfahrene Supervisoren machen.

*

- **A comprehensive overview of the systems approach to clinical supervision.**

*

- **Practical guidance on how to apply the systems approach to supervision.**

*
